WHAT IS METConn?

METConn℠
An SAE Government Technologies™ Program

About METConn

Mobility & Emerging Technologies Connect (METConn) brings together stakeholders in battery manufacturing and emerging technologies to promote collaboration, innovation, workforce development, professional networking, training, and education. METConn will serve as the community's central hub, providing news, events, job listings, funding opportunities, professional development resources, regional hubs, and topic-based groups for professionals, educators, veterans, students, and others seeking training, career opportunities, leadership development, and collaborative networks.

If you'd like to join or learn more, simply scan the QR code below to create your METConn account, and be sure to follow our LinkedIn page to stay informed.

Areas of Interest:

Batteries, Mining & Refining for Critical Minerals,Robotics, Smart Factories & Industry 4.0, Electrification, Hybridization, Autonomy & Drones,Grid Modernization & Energy Storage, Semiconductors, Chips & Microelectronics, Machine Learning (ML) & Artificial Intelligence (AI), Water Technology & Resource Management, Shipbuilding & Submarines, Battery & E-Waste Recycling...and more!

History of METConn

The Industrial Base Analysis and Sustainment (IBAS) and SAE Government Technologies (SAE GT) created this program to develop a community that will help transform an emerging U.S. industrial base. The initiative – called Mobility & Emerging Technologies Connect (METConn) – aims to connect stakeholders in battery manufacturing and other technologies while fostering collaboration and innovation.
