

Our new software system RMS has now launched! As mentioned in our previous email, you will receive another email directly from RMS on how to set up your username and password.

We have developed a RMS Client User Guide to help you learn about all the functionality of [RMS](#) which we will send along shortly. We are also recording a training demo and will share this with you once completed.

We have migrated all EQM data, but ask that you please review your company details: certificate, scope, address, employee counts to be sure we have accurate information. Please let us know if any details are not accurate by filling out the [Contact Us form](#) on our website and note any details that need changed.

For those clients who have audits currently in process, please continue to use EQM as we transition to RMS. We will keep EQM operating until the end of December and if there are any remaining open actions for the audit in process, we will migrate them to RMS. All audits starting after December 15th, will be conducted in RMS. You will begin to

receive email notification when any new tasks assigned to you.
