

NADCAP® AUDIT CRITERIA REVIEW - CHEMICAL PROCESSING

ABOUT THE COURSE

The one-day Nadcap Checklist Review - Chemical Processing course provides a complete overview of Nadcap requirements related to the Chemical Processing audit, focusing solely on technical aspects.

After an introduction about Nadcap and Nadcap audits, the Instructor covers the topics below:

Top Non-conformances (NCRs), including NCRs examples and NCRs responses. Also covered are the different NCRs categories and groupings as well as NCRs reports.

Review of the AC7108 & Supplemental Checklists to clarify the requirements of each section of each checklist. The Instructor also presents information on frequently found problems as well as explanations of current requirements and interpretations from the Task Group.

Preparing for the audit through a description of the planning needed during the six months before the audit, which also details actions that must be taken such as a self-audit and sending advance information to the Auditor.

What should happen during a Chemical Processing audit, from the moment the Auditor arrives until he leaves after the closing meeting.

“MUCH NEEDED. NECESSARY EVEN FOR SHOPS ALREADY NADCAP CERTIFIED.”

Course Objectives

- Present the structure and format of a Nadcap Chemical Processing audit
- Assure an understanding of the content and intent of all sections of each checklist used
- Review the common findings and provide examples of how to meet requirements

Who should attend?

- Those who have general oversight responsibilities for Nadcap audits, or supporting them
- Those who are new to Nadcap
- Those who need to understand, or to confirm their understanding of what should be happening during Chemical Processing audits
