

NADCAP® AUDIT CRITERIA REVIEW - ELECTRONICS

ABOUT THE COURSE

The one-day Nadcap Checklist Review - Electronics (ETG) course provides a complete overview of Nadcap requirements related to the ETG audit, focusing solely on technical aspects.

After an introduction about Nadcap and Nadcap audits, the Instructor covers the topics below:

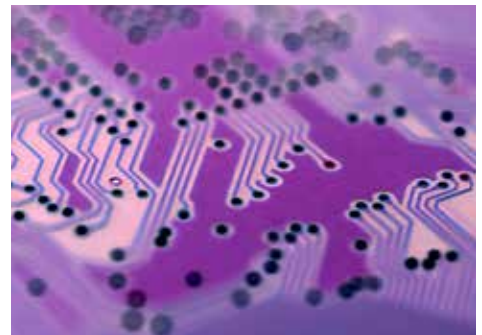

Top Non-conformances (NCRs), including NCRs examples and NCRs responses. Also covered are the different NCRs categories and groupings as well as NCRs reports.

Review of the AC7119, AC7120, and AC7121 & Supplemental Checklists to clarify the requirements of each section of each checklist. The Instructor also presents information on frequently found problems as well as explanations of current requirements and interpretations from the Task Group.

Preparing for the audit through a description of the planning needed during the six months before the audit, which also details actions that must be taken such as a self-audit and sending advance information to the Auditor.

What should happen during an ETG audit, from the moment the Auditor arrives until he leaves after the closing meeting.

Also included are a review and explanation of Subscriber flow down of information and an introduction on New Technology from a Nadcap ETG audit perspective.

Course Objectives

- Present the structure and format of a Nadcap ETG audit and its scope
- Assure an understanding of the content and intent of all sections of each checklist used during an ETG audit
- Review the common findings and provide examples of how to meet requirements

Process Owner

- Those who have general oversight responsibilities for Nadcap audits, or supporting them
- Those who are new to Nadcap
- Those who need to understand, or to confirm their understanding of what should be happening during ETG audits
