

CONTRACT REVIEW FOR AEROSPACE SUPPLIERS

ABOUT THE COURSE

The one-day Contract Review for Aerospace Suppliers course covers the components required to establish a system which complies with AS/EN/JISQ 9100 requirement. The Instructor covers the topics below:

What is Contract Review describing the differences between orders, enquiries and changes to orders, as well as explaining what are the existing requirements for a Contract Review system.

Customer requirements via the hierarchy of requirements – orders, drawings, and general specifications; what hidden requirements can exist and how they can be found; handling nested specifications; guidance for handling out-of-date specifications – supersession rules.

Other Requirements such as Nadcap® regulatory and more.

Review of requirements & realization looking at how to review capability to supply to contract; the need for risk assessments; what to do if there are discrepancies; the role of tools such as FMEA, capability lists, or process control matrix; and flow down to sub-suppliers.

Order Handling such as order vs quotation or handling changes to orders, including specification revisions.

“VERY WELL PRESENTED WITH GOOD PROCESS KNOWLEDGE.”

Course Objectives

- Clarify the requirements for Contract Review in the aerospace sector
- Present the components of a Contract Review system
- Explain technical requirements particular to aerospace

Who should attend?

- Those who have general oversight, management or support responsibility for pyrometry and need to understand the requirements
- Pyrometry Service Providers
- Quality Manager and/or Quality Engineer
